

Customs Brokerage & Special Regimes

Secure, agile and optimised solutions

End-to-End Customs Expertise

Comprehensive customs support from pre-shipment planning to final clearance, covering import/export, documentation accuracy and regulatory alignment.

Compliance & Risk Management

High-precision fiscal classification, regulatory checks, and audit support that reduce exposure to fines, delays and unexpected assessments.

Tax Optimisation & Special Regimes

Tailor-made studies and simulations for REPETRO SPED, Temporary Admission, Drawback and more.

Operational Agility with Local Experts

Direct liaison with local team ensures faster decisions, smoother work-flows and predictable clearance for complex cargo.

As Brazil's industrial and offshore activity accelerates, so does the complexity of customs clearance, fiscal classification and tax planning. Our dedicated team in Rio delivers clarity, control and compliance for even the most demanding projects.

Why Clients Choose Us

Our local expertise and global strength, offers a direct channel to Customs authorities across Brazil and decisions grounded in real regulatory insight.

With high technical precision, especially in NCM classification for complex, high-value cargo, we help reduce risks, delays, audits and fines.

This is backed by end-to-end confidence, supporting clients from pre-shipment planning through post-clearance and integrating seamlessly with Blue Water's wider project logistics capabilities.
