Blue Water Shipping Chile SpA was established in August 2023 based on trust and support of our global clients and partners, and to serve our existing and new client network with project and freight forwarding services in the mining, energy, renewable energy and chemical sectors. Supported by a global network of over 80 offices and 2,500+ employees, Blue Water Chile can provide clients with the level of customer service they have come to expect and require. Blue Water Chile is now the second country in the Latin American region where we established offices, as Blue Water Brazil has a history of several years serving the global client network.

International and local general freight forwarding, project logistics, resupply logistics, customs brokerage, materials management and customised IT solutions. Whatever your needs may be in the above-mentioned sectors, Blue Water has the expertise to accommodate them.

With vast experience specifically in project and resupply logistics, Blue Water Chile, along with our global office network and specialised agent network, can support customers finding the best possible solutions for your logistics needs and requirements. Contact us today. Together We Create Solutions.
