Experts in FPSO transport and logistics

Blue Water has comprehensive experience within transport and logistics for FPSO projects. Our worldwide set-up includes more than 80 offices which has handled challenging project cargo all around the world. This includes thousands of shipments for full conversions of FPSOs such as FPSO project Agogo, Barossa & One Guyana.

At Blue Water we always focus on our clients when providing the best reliable service.

Key locations

With a network of offices placed in key locations for the industry such as Rio

de Janeiro, Esbjerg, Houston, Singapore, Rotterdam, Amsterdam, Shanghai, Milan, Sydney and Aberdeen we provide worldwide local expertise with global knowledge.

Personal service and trust is core for our business – we always aim to create the optimal solutions in close cooperation with our clients – some of which we have made business with for more than 30 years.

FPSO experience

We have established ourselves as a serious and trustworthy business partner within the Oil & Gas industry in connection with FPSO projects. With local experts and network we are close to our clients and operations.

Our in-house experts include experienced naval architects,engineers, port captains, project freight forwarders and our own HSSEQ and legal department.

Also, tailor-made IT-solutions which are integrable with our clients own systems is part of the added services which guarantees the best possible solutions of high quality.
