

## Global Reefer Logistics

With our global expertise you can benefit from our quality solutions

## Worldwide logistics solutions to the reefer industry

Blue Water Shipping have been involved in the global reefer market since 1972.. Starting with reefer bulk-vessels with dairy products from Europe to Middle East, moving into the booming export market from South America, into worldwide containerization by the late 80's.

During the last decades Blue Water has built a reputation as a reliable expert within transport of temperature controlled cargo. Our dedicated specialists have a long and valuable experience with markets, commodities and solutions.

Our focus is on high quality service and a proactive approach to daily challenges to ensure a smooth transportation process from our clients to their clients.

We have own locations in all the major sourcing markets globally and a dedicated cross trade group to focus and cater for our customer's needs.

Our global volume gives us access to strong buying rates and contacts with the main reefer shipping lines globally and locally.

### **Reefer experts at key locations**

With carefully selected office locations worldwide, we pride ourselves to be represented in all reefer markets from South & North America throughout Europe & Middle East to Far East and Australia.

It takes the right team to ensure an unbroken cold chain for temperature-controlled products. Our experienced and professional teams provide the best customized solutions including cross trade, door-to-door delivery, combined transport, as well as cold storage of the products.

We offer worldwide reefer container transport from all origins to all destinations, using A-categorised carriers and chartered vessels – Our service also includes a unique IT system for monitoring every step of the transport. Whether our customers are shipping Proteins, Seafood, Dairy or Pharmaceuticals, we are able to cover their needs and demands.

# We operate within these areas

## Road Transport

We operate a fleet of more than 300 reefer trucks. Our reefer trailers are monitored, thus keeping us informed about the exact position and temperature of the cargo.

## Sea Freight

Through our worldwide network of offices and contact with all major shipping lines, we can deliver your cargo to any port in the world.

## Air Freight

Blue Water Shipping is official IATA agent since 1978, and we are enjoying access to all major airlines, and also benefit with a local approach

## Rail Transport

Choose rail if you want a reliable service with low environmental impact reducing the transit time from door-to-door.

## Courier Transport

Our courier service is the perfect solution if speed and flexibility are important to you. You can book easily using our online system.

## Reefer Logistics

It takes the right team of specialists to ensure an unbroken cold chain for temperature-controlled products and shipments.

## Marine Logistics

We provide tailored solutions to the Cruise & Marine industry through a long-standing cooperation with our global network.

## Renewables

The future is wind and solar power. We have been on board from the beginning offering broad experience within the renewables sector.

## Port Service

We deliver full service to vessels and crew within port service and port agency through our worldwide network and dedicated agents.

## Oil, Gas & Projects

We handle complex and oversize project transports, and we do heavy lifts all over the world. Do you have a challenge for us?

# Crosstrade through global network

## Our company is based on in-house competences and expertise

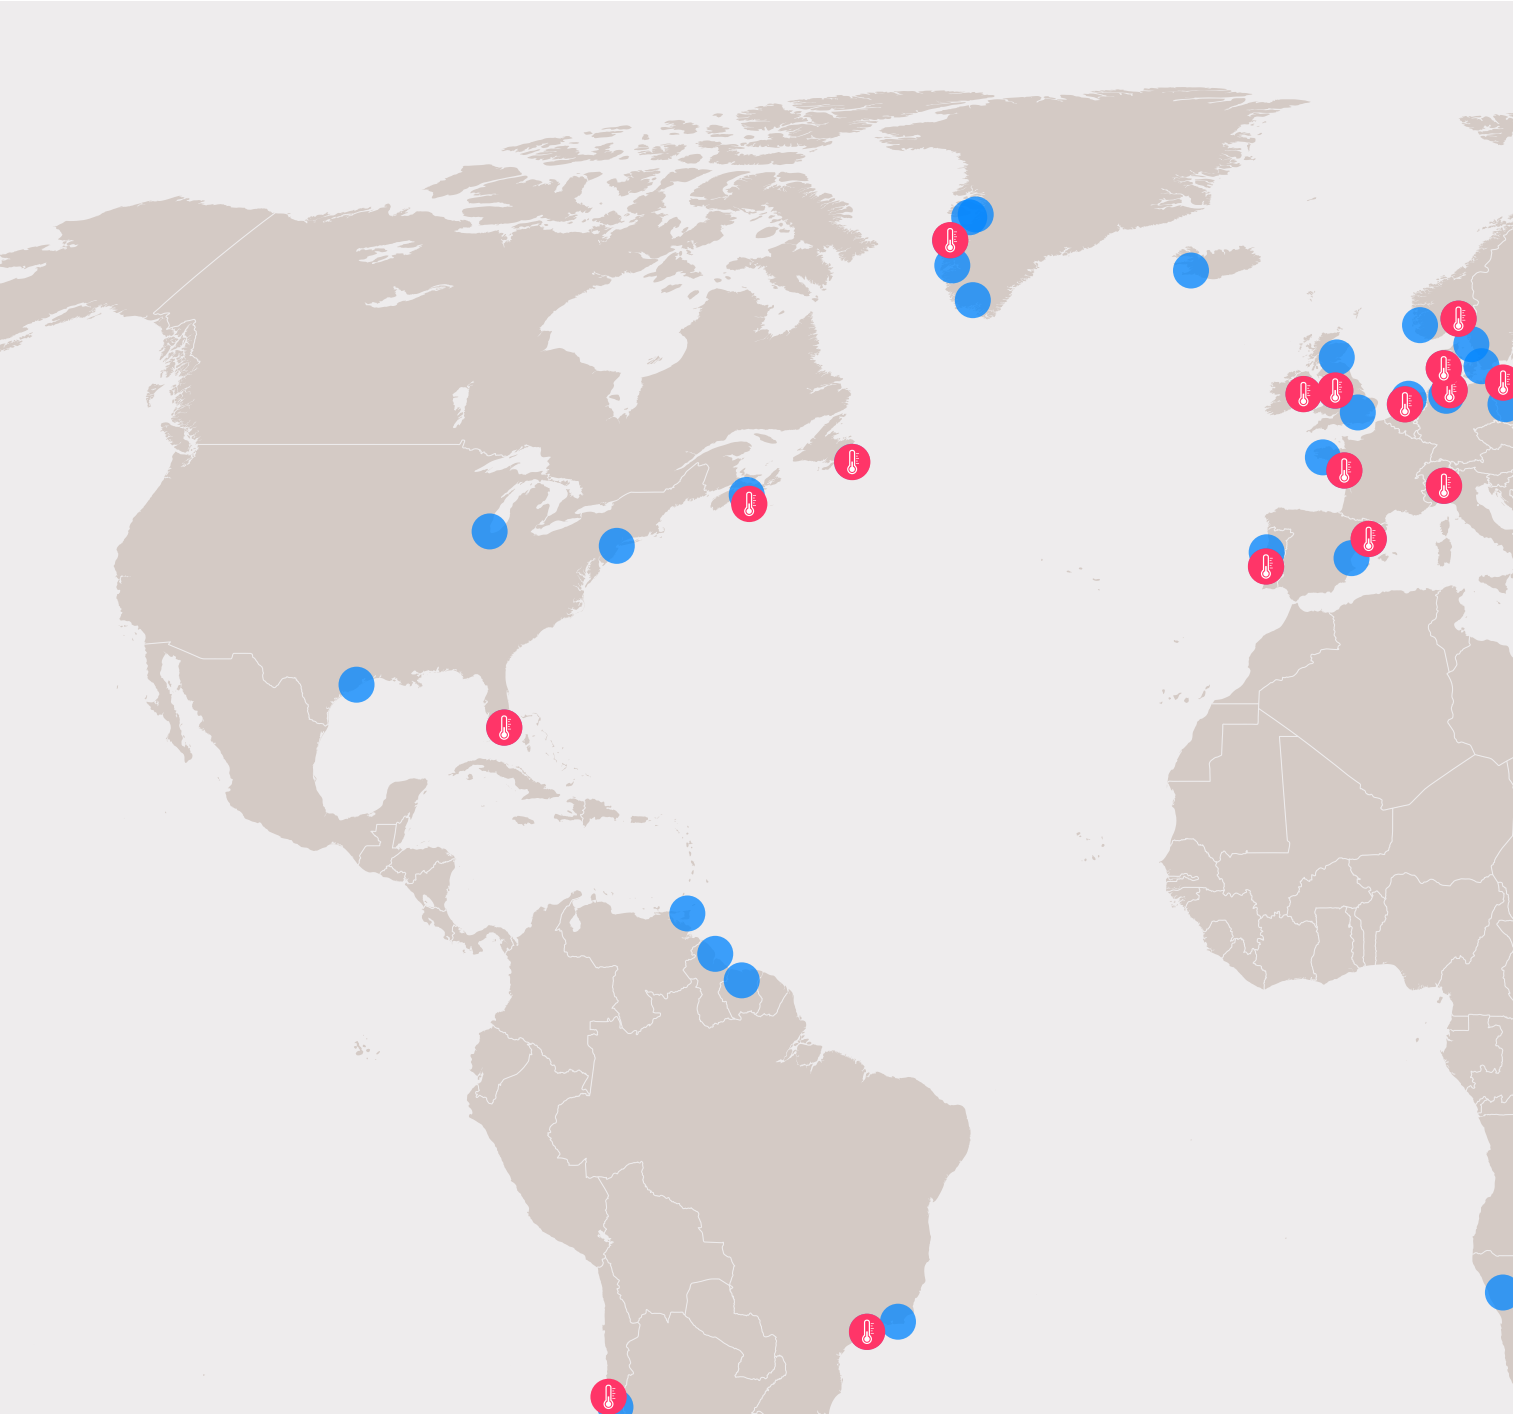

Through a comprehensive network of our own offices, combined with agents and partners in markets all over the world, you will benefit from our crosstrade services, from anywhere to everywhere using our local contacts and their expert knowledge.

Whether you need to ship beef from South America to the Middle East, fish from the Far East to West Africa or poultry from USA to China, we have the experience and the right connections to move your cargo in an efficient and competitive way.

Today, Blue Water is represented with more than 80 offices worldwide. In every Blue Water office, we combine our strong global network with local expertise – thereby adding value and providing our clients with services beyond transporting cargo in a safe and efficient way since 1972.

# Best reefer logistics solutions partner

## Highly reliable services

Blue Water has a established team of 200+ dedicated experts supporting global perishables logistics and a strong in-house competence model across forwarding, customs, shipping, HSSEQ and operations.

## Control tower approach

For major food exporters and high-frequency shippers, we also offer a Key Account / Control Tower approach that reduces complexity and increases visibility. It's a long-term setup focused on keeping communication direct, improving follow-up and ensuring rates, claims, IT solutions and operational performance all being managed as a system.

## What makes Blue Water different-

Many providers can quote a lane. Fewer can run a reefer transport program.

Blue Water's unique proposition is our ability to combine three advantages into one operating model:

### A) Deep reefer road strength paired with global multimodal reach

With 300+ reefer trucks, experienced staff, daily departures and reliable partners, road is a major pillar of our perishables offering. We extend into sea and air solutions depending on the product need urgency, so customers can switch modes conveniently without changing partners.

### B) Built-in monitoring and 24/7 operational response

Blue Water supports trailer monitoring including temperature and position tracking,

supported by a 24-hour service model.

### C) Customer real time visibility through digital tools

We invest in digital solutions that support real decision-making and reporting.

### D) Sustainability

We offer multiple practical levers to reduce CO<sub>2</sub> through:

- 1) *Mode optimisation: choosing the smartest transport model to reduce CO<sub>2</sub>.*
- 2) *Insetting: reducing emissions inside the value chain, working with our partners to perform a fuel switch to sustainable fuels for their road transport. This method is known as insetting. Blue Water also provides CO<sub>2</sub> dashboards showing emissions across shipments—from carton level to full load—using widely adopted calculation methodology.*

# Customer testimonials

“Blue Water is great at transparency and sharing know-how. They understand how we work and the know-how of the reefer industry is great.”

“Blue Water is very routed in our business. Sometimes they know our suppliers and our customers better than we do ourselves.”

“Blue Water always solves the problem. Every need is being fulfilled.”

“Blue Water is very proactive, solutions oriented and flexible.”

“We have been working with Blue Water for 20 years - it is a relationship that is very open and based on trust.”

“Blue Water is honest, professional and trustworthy. In the reefers segment, they are one of the leaders.”

## Documentation

- › Blue Water can support your import and export documentation for temperature-sensitive food products by managing the full paperwork flow—from commercial invoices, packing lists, COOs, and health certificates to customs and destination-specific requirement.
- › We help align documentation and coordinate closely with shippers, carriers, and authorities to keep every reefer shipment compliant, correctly declared, and delivered on time.
