SHIPPING

Together we create solutions

We do much more than moving cargo from A to B

80+

Offices

60+

Countries

50+

Years

We are not a “big box” forwarder, and that’s intentional. Our strength lies in combining deep industry expertise, local knowledge, and a global network to solve the complex challenges our customers face every day.

Since 1972, Blue Water Shipping delivers end-to-end logistics solutions for energy, mining, and industrial projects worldwide.

Through our global network and dedicated project teams, we help customers move complex cargo safely, efficiently, and on schedule.

Steven Lofaro

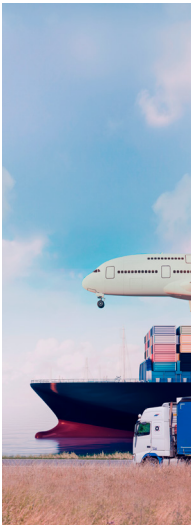

Vice President, EPP Americas

We operate within these areas

Project Logistics

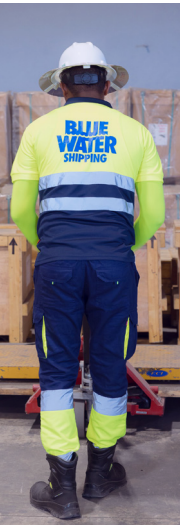

Ocean & Air Freight

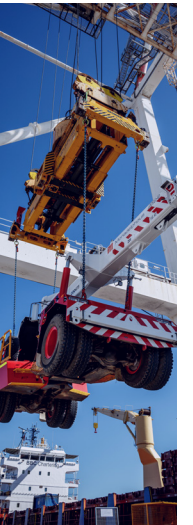

In-House Engineering

Customs Brokerage

Warehousing

Heavy Lift

Chartering

Our value-adding service and expertise

End-to-End Project Logistics

Dedicated Project Teams

Heavy Lift Expertise

Global Network

Time-Critical Logistics

Customs & Trade Compliance

Reduce costs beyond transportation with complimentary tariff & trade advisory

Tariff review

Duty mitigation

Trade compliance

Supply chain optimization

“

Every shipment deserves a second look. Through our complimentary tariff and trade review, we help clients determine whether they qualify for duty concessions, recover overpaid duties, and identify cost-saving opportunities across their supply chain. Customs compliance should serve not only as a shield against risk but also as a key driver of competitive advantage.”

- Ramon Patlon, Customs & Compliance Manager

Energy projects

Turnkey services for oversized and complex cargo

We provide comprehensive project transport and logistics solutions tailored to the Oil & Gas and Industrial sectors. We specialise in handling and planning heavy oversized cargo transport and complex out-of-gauge shipments.

Areas of expertise

- Trusted FPSO partner
- Out-of-guage transport
- Route planning and studies
- Integrated IT systems
- Operating base facilities and pipe yards
- In-house Technical Engineering Department

“

Complex cargo doesn't move on experience alone, it moves with engineering. From lift planning and structural analysis to transport studies and installation support, our TED team develops the technical solutions that give our clients confidence before execution begins”

- Nathan McCormick, PE
Regional Technical Engineering
Manager - Americas

Mining projects

Optimizing supply chain operations and capital projects

Our team is specialized in turnkey, high-value projects. We take advantage of our expertise and mining specialists to optimize supply chain operations and capital projects.

Areas of expertise

- › Global specialists
- › Involvement from implementation to Execution
- › Supply Logistics
- › Operating Mining
- › Construction or expansion
- › Transport specialists
- › Site Services experience
- › Flexible upsize and downsize resources
- › Customs brokerage & consultancy

“

Driving strong commercial performance requires disciplined execution and informed decision-making that delivers value for our clients. Chartering is more than fixing vessels—it is the strategic management of risk, relationships, and market exposure to keep projects moving.

- Faith McAdams
Regional Head of Chartering
Americas

Trinidad & Tobago

Guyana

Suriname

Caribbean hub

Local expertise, regional reach

Blue Water combines global logistics capabilities with strong local knowledge and operational expertise throughout the Caribbean, supporting customers in energy, mining, offshore, and industrial markets.

Caribbean capabilities

- › End-to-end logistics solutions
- › Seamless project execution
- › Customs and permit expertise
- › Regulatory compliance support
- › Efficient crew mobilization
- › Crew change coordination
- › Local content compliance
- › Strategic procurement support
- › Reliable supplier management
- › Port agency services
- › Vessel operations expertise
- › Regional warehousing solutions
- › Inventory visibility and control
- › Optimized supply chain mgmt
- › Single-source logistics partner

With a strong regional footprint and decades of experience, Blue Water delivers the local expertise and global capabilities needed to execute complex projects across the Caribbean.
